# Forecitation

I have supervised several bachelors' theses and other student projects.

You surprised me with your **commitment** and **effort**.

## Challenges in training neural networks

- ▶ Takes forever!
- ▶ Might anything be wrong?
- ▶ If yes, what?
- ▶ Is it developing better than its precedants?
- ▶ Why does it take forever?

A tool that would

- ▶ facilitate experiment management
- ▶ provide information on ongoing experiments
- ▶ be able to autoterminate experiments
- ▶ archive all results
- ▶ possibly even facilitate analysis

## Other requirements

- ▶ lightweight
- ▶ easily extensible
- ▶ open source
- ▶ good usability
- ▶ framework agnostic

# Journey map

neroman

neromum

nerokid

# Technical challenges & ASRs

- ▶ deeply technical and an advanced domain
- ▶ remote computing nodes and cluster management
- ▶ good usability? according to whom?
- ▶ framework agnostic?

A three component tool involving Python, SSH and sockets that ... **meets the vision!**

- ▶ All core functionality **Done.**
- ▶ Most features accessible both via CLI and GUI.
- ▶ PO satisfied.
- ▶ We are proud!

**Demo**

Quality

Process

Effort

Remarks

Live demonstration of the final product including:

1. Cluster & experiment configuration
2. Experiment submission
3. Fetching updates/results
4. Viewing plots

Focus on the GUI this time.

# Recap

Project report

Neronet

People

Project

Results

Demo

Quality

Process

Effort

Remarks

In essence the product is a Python-based tool that enables computational researchers to conduct their research more effectively.

- ▶ It utilizes SSH and TCP sockets to distribute computational experiments into remote computer nodes.
- ▶ It is framework agnostic in that it permits the use of a very wide variety of tools to actually conduct the computing needed (Theano, Torch, Scipy, Matlab, R, C++, whatever).

# User feedback

Project report

Neronet

People

Project

Results

Demo

Quality

Process

Effort

Remarks

We utilized lots of end user testing and received great feedback from a Triton admin:

- ▶ Thought that our design and architecture was well devised.
- ▶ Offered performance improvement ideas.
- ▶ In general he liked our usability as did our PO.

**Quality**

Process

Effort

Remarks

Quality assurance was based on

- ▶ the DoD, and
- ▶ our QA practices

We updated our DoD and practices several times.

# Definition of done

We defined **Done** at the BI, sprint and project level.

- ▶ BI level: unit tests, code conformity, commenting, documentation, peer review
- ▶ Sprint level: BIs **Done**, unit and system tests ok, sprint goal achieved.
- ▶ Project level: all sprints **Done**.

Used QA practices and tools:

- ▶ Unit test framework
- ▶ Commenting & documentation
- ▶ System testing
- ▶ Peer review

# Quality attributes

Project report

Neronet

People

Project

Results

Demo

**Quality**

Process

Effort

Remarks

Added emphasis on these attributes:

- ▶ Usability
- ▶ Reliability
- ▶ Extendability
- ▶ Performance

Time	Event	Participants
30.10. 16-18	Project kickoff	team, PO
13.11. 15-17	S0 demo	team, Coach
16.11. 11-13	S1 planning	team, PO
04.12. 16-17	S1 & progress review	team, PO, Coach
04.12. 17-18	S2 planning	team, PO
13.01. 19-20	S2 review & S3 planning	team, PO
01.02. 14-16	S3 review & S4 planning	team, PO
29.02. 13-14	S4 & progress review	team, PO, Coach
29.02. 14-15	S5 planning	team, PO
30.03. 16-18	S5 review & S6 planning	team, PO
13.04. 16-17	S6 & project review	team, PO, Coach
19.04. 16-20	Quality award & party	team, Coach

- ▶ S1: Develop a prototype that offers the most basic functionality via a CLI **Done**
- ▶ S2: Develop a stable version for end user testing **Done**
- ▶ S3: Finish asynchronous system functionality and create a GUI mockup **Done**
- ▶ S4: Publish Neronet as an open source project **Done**
- ▶ S5: Finish Neronet 1.0 **Done**
- ▶ S6: Grab the quality award! ?

There were few stories that were deferred or completely cancelled, but no unpleasant surprises.

## Final remarks:

- ▶ The project realized the initial vision
- ▶ Complicating factors
- ▶ Simplifying factors
- ▶ Additional points

# Complicating factors

## Complicating factors

- ▶ PO mostly in London
- ▶ Little additional CSE expertise available (only the Coach)
- ▶ Very difficult domain
- ▶ Very inexperienced team
- ▶ Only five developers
- ▶ PO nor the Scrum master had participated in the course before

Project report

Neronet

People

Project

Results

Demo

Quality

Process

Effort

Remarks

# Simplifying factors

## Simplifying factors

- ▶ Our PO was very motivated and straightforward
- ▶ Our coach gave us very valuable support
- ▶ We had high motivation

Project report

Neronet

People

Project

Results

Demo

Quality

Process

Effort

Remarks

# Additional points

- ▶ Sprint team leader system
- ▶ User guide/manuals in communication
- ▶ Early end user testing
- ▶ OS future focus
