Overview

We have defined Done in three levels:

- 1. At the backlog item (BI) level
- 2. At the sprint level
- 3. At the project level

In addition, important quality attributes are specified to ensure fulfillment of nonfunctional requirements.

Quality attributes

High priority quality attributes:

- Usability (easy to learn by newbies)
- Reliability (no crashes or lost data)
- Extendability (can be customized)
- Performance (low overhead)
